**Series Solutions Near a Regular Singular Point**

Series Solutions Near a Regular Singular Point We will now consider solving the equation  $P(x)y'' + Q(x)y' + R(x)y = 0$  (1) in the neighborhood of a regular singular point  $x_0$  For convenience, we'll assume that  $x_0 = 0$  If  $x_0 \neq 0$ , we can transform the equation into one for which the regular singular point is 0 by making the change of variables
